

A1 BUILDS UPON AND BRINGS TOGETHER TWO IMPORTANT TRENDS IN IT:

- Software-defined everything's climb up the tech stack
- The overhaul of IT operating and delivery models under the DevOps movement

BENEFITS

- Enables lower costs and higher margins for competitor and market advantage
- Delivers a holistic customer and service focus
- Manages higher magnitudes of scale with minimal change in cost
- New data intensive service offerings

A1 - Transforming Telco and Data Centre Ops #itops

WHY CHOOSE AQOVIA?

- Aqovia build solutions based on **value, enablement and efficiency**
- Our **highly-skilled specialists** are **experts in their fields**
- We work in a **collaborative and agile** way, operating as an extension of your business
- Aqovia are **forward-looking** and empower organisations to embrace a 'digital first' culture
- We work to find the most **innovative, cost-effective** solution to meet your needs

Our expert engineers, analysts and designers have a vast market knowledge and will collaborate with you to create smart, cost-efficient, user-friendly solutions to help your business to grow.

A1 | AUTONOMIC PLATFORM

STREAMLINE AND SCALE UP WITH THE AQOVIA A1 AUTONOMIC PLATFORM

We are part of the movement taking automation to the next level by basing it in machine learning and creating a self-managing platform that lowers the time needed to be spent on complicated tasks.

The A1 Autonomic Platform can be applicable to various scenarios, including Telco, Metro Cloud solutions and IoT.

Our Autonomic Platform is a cloud based tool, which plugs in to your company's entire telemetry data streams and expands the grid through self-configuration, self-optimization and self-healing functions.

Proactive Incident Management

Fraud Detection and Management

Energy Infrastructure Management

ABOUT AQOVIA
