440x

faster lead time from commit to deploy

5x

lower change failure rate

Aqovia's experts will conduct a review of your existing technology applications and infrastructure and recommend the best approach to adopt a DevOps approach for product, development and operations.

Aqovia deploy software solutions using an agile framework, ensuring high product quality, greater customer satisfaction and a faster ROI.

A cultural shift and adoption of DevOps is not simple or easily achieved. Aqovia have been practicing and implementing DevOps for more than 5 years and partner with our clients to achieve a clear and transparent communications framework, leverage automation and implement tools to help teams achieve rapid productivity gains.
