The Aqovia SDN and NFV solution offers a light touch integration based on a top down, value based approach, using three key areas of expertise:

▌Pedigree of Software Development excellence

▌Global WAN Network roll out and optimisation

▌Business Intelligence Analysis

BENEFITS

SDN and NFV are equally critical parts of a modern virtual network and allow Cloud service providers, Telcos and Enterprise network operators to:

▌Reduce Network Capex and Opex

▌Increase velocity of go-to-market campaigns

▌Data-driven identification of new revenue streams

▌Increase efficiency of compute, storage & resource time

Human-Centric, Machine Assisted

CAPEX   OPEX   Complexity

Machine-Centric, People Assisted

CAPEX   OPEX   Complexity

WHY CHOOSE AQOVIA?

▌Aqovia build solutions based on **value, enablement and efficiency**

▌Our **highly-skilled specialists** are **experts in their fields**

▌We work in a **collaborative** and **agile** way, operating as an extension of your business

▌Aqovia are **forward-looking** and empower organisations to embrace a 'digital first' culture

▌We work to find the most **innovative, cost-effective** solution to meet your needs

Our expert engineers, analysts and designers have a vast market knowledge and will collaborate with you to create smart, cost-efficient, user-friendly solutions to help your business to grow.

Virtualisation

PIONEERING SDN AND NFV SOLUTIONS TO HELP BUSINESSES REDUCE COSTS AND MAXIMISE RETURN ON INVESTMENT

Reducing the time to resolve support tickets (Assurance) by **70%**

SDN and NFV are complementary approaches, both aim to advance a software-based approach to networking.

SDN is a broad term that describes the separation of the management, control and data-forwarding planes of networks.

While SDN is a critical step on the path to a modernised network, many services are still tied to the underlying hardware.

NFV focuses on optimising the network services themselves and decouples the network function from the hardware, virtualising it. This allows it to be run in a virtual machine on any compute platform, where it can self-manage.

ABOUT AQOVIA

Delivering innovative and bespoke **digital solutions** to excel your business

Aqovia is an international Artificial Intelligence (AI) and digital solutions specialist, combining elite and cutting edge technologies to provide sophisticated and bespoke transformation solutions to the public and private sectors.

We use our extensive experience and proven track record in Business Transformation, Systems Integration and Software Development to deliver innovative solutions spanning telecoms, technology, media, education, finance and government.

Artificial Intelligence based operational excellence **#aiops**
