Aqovia DevOps for Enterprise and Government

processes, tools and services to help client product, development (Dev) and operations (Ops) teams achieve quality and fast paced delivery through automation, collaboration and cultural change management.

Why DevOps

Faster pace of Development

Greater Quality Assurance

**Happier end users**

Better Applications and Products
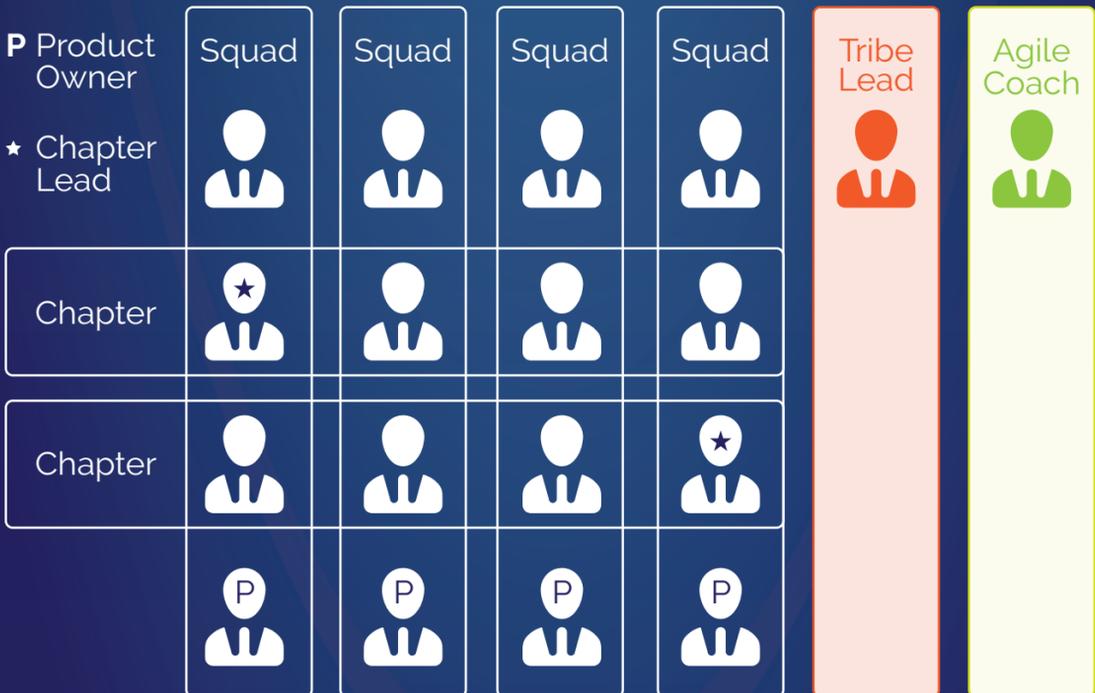

### Old way of working
Functional divisions build walls

Code | Build | Test | Release | Operate

New way of working
DevOps creates collaborative bridges

1. Code
2. Build
3. Test
4. Release
5. Deploy
6. Operate
7. Monitor
8. Plan

Cross functional teams and flexible structure

	Squad	Squad	Squad	Squad	Tribe Lead	Agile Coach
P Product Owner / ★ Chapter Lead

Aqovia DevOps toolkit and tool delivers Return on Investment and DevOps Intelligence

Code lifecycle management

End User (multi-dimensional)

Support (multi-dimensional)

Application and Infrastructure performance

Aqovia **A1 Intelligence and Analytics**

46x more frequent code development

96x faster mean time to recover (MTTR)

440x faster lead time from commit to deploy

5X lower change failure rate

A cultural shift and adoption of DevOps is not simple or easily achieved. Aqovia have been practicing and implementing DevOps for more than 5 years and partner with our clients to achieve a clear and transparent communications framework, leverage automation and implement tools to help teams achieve rapid productivity gains.

Aqovia's experts will conduct a review of your existing technology applications and infrastructure and recommend the best approach to adopt a DevOps approach for product, development and operations.

Aqovia deploy software solutions using an agile framework, ensuring high product quality, greater customer satisfaction and a faster ROI.
